• Yaragh Sazan Arman •

YSA is a modern organization which offers different services including engineering and manufacturing. The company has specialized in the following areas.

- Fittings and Hardware for Electrical Power utilities especially high voltage Transmission Lines and Substations from 11 KV to 765 KV.
- OPGW & ADSS hardware & Fittings.
- Designing and Manufacturing of all metal parts for oil and gas industry, especially in forge and casting field.
- Electrical railway lines fittings.

The company is organized into six departments as follow:

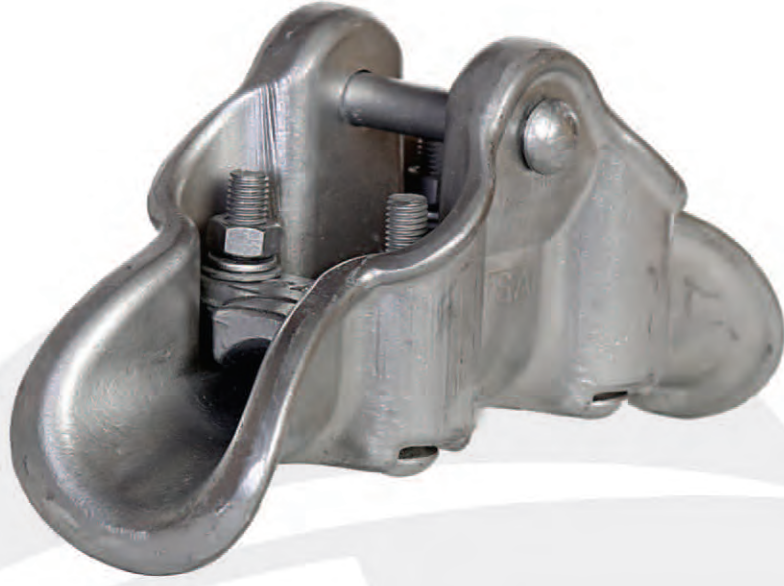

- Design and Engineering Department
- Research & Development Department
- Production Department
- Quality Control Department
- Commercial Department
- Administration & Financial Department

We have performed successfully all important type tests for different ranges of our products in famous European laboratories and received the type test certificates for our products.

YSA also has received the International Quality Management System Certificate ISO 9001 from GLOBAL GROUP UK.
